

NADRIX

Genesis Private Sale

Participant Guide

CLAIM YOUR FUTURE · OWN YOUR FREEDOM

Welcome, Genesis member. This guide walks you through the on-site steps to complete your subscription. If anything is unclear, contact us through the official channel at the end — do not act on instructions from anyone else.

Before you begin

You should already have:

- Completed KYC / accredited-investor verification and signed the subscription agreement with our team (handled offline). Only pre-approved participants can complete the steps below.
- A self-custody wallet — MetaMask, OKX Wallet, or Trust Wallet — set to **BNB Chain (BSC)**.
- In that wallet: **USDT (BEP-20, on BNB Chain)** for your intended amount, plus a small amount of **BNB** for gas (about US\$1).

The sale is not available to residents of restricted regions: Mainland China, North Korea, Iran, Cuba, Syria, Russia, Venezuela, Belarus, Myanmar, Algeria, Bangladesh, Egypt, Afghanistan, Morocco, Iraq, Nepal, Qatar, Tunisia, Bolivia.
(Updated 2026-06-30, legal-verified)

What you are buying — please read carefully

- **NADX at the Genesis price of 0.0025 USDT per NADX** (half the public price). The Genesis round is limited to **100 whitelist spots** in total.
- **Your purchase is locked (vested), not delivered immediately.** Release schedule: a **6-month cliff**, then **18 months of linear release**, all starting at **TGE (Token Generation Event / listing), 1 January 2027 (UTC)**.
- This means: after you pay, NADX will **not** appear as a spendable balance in your wallet. Instead you receive an on-chain **Sablier lockup stream** that represents your locked NADX. Nothing is claimable for the first 6 months after TGE; after that it unlocks gradually (linearly) until 24 months after TGE.
- You can check your locked amount and unlock progress anytime on the **"My Subscription"** page.
- Genesis benefits: half price + a **Genesis invite code**. You use that code **once**, to open your own Nadrix account — one account covers every Nadrix app — and that makes you a root node of the invitation network. From then on you invite other people with **your own** invite code, issued to you at signup. Full benefits are described in the Genesis benefits document you receive by email. (No dividend, yield, or governance rights are attached.)

Step 1 — Apply (join the whitelist)

- 1 Open the official Nadrix site: <https://nadrix.io/private-sale> (Genesis Private Sale).
- 2 Click **Connect Wallet** and connect the wallet you will invest with. Your address is captured automatically — use this **same wallet** throughout.
- 3 **Sign the login request** in your wallet. This is free (no gas) — just a signature proving you own the address.
- 4 Click **Apply** and fill in: email, nationality, intended amount (choose a tier), and optionally your industry / a short bio. Submit.
- 5 Your status shows **"Under Review."** Our team matches your application against your completed offline approval.

Step 2 — Receive your whitelist code

- Once approved, you receive an **email** with: your **Genesis invitation code** (this is also your whitelist code) + the **Genesis benefits document (PDF)**.
- The code is unique to you and tied to your wallet address and email. Keep it private.

- The code is valid for **48 hours from the time the email is sent**. If you do not complete your subscription (Step 3) within that window, the code and your seat expire automatically and any payment sent after expiry is refunded. If you miss the window, contact support before sending funds.

Step 3 – Subscribe and pay

- 1 Return to the site and **Connect Wallet** (the same wallet as Step 1).
- 2 Your button now shows **Activate** — click it and enter your **Genesis invitation code** (within 48 hours of receiving it; an expired code is rejected).
- 3 Choose your **amount (tier)**. The page shows the NADX you receive (amount ÷ 0.0025):

Pay (USDT)	Receive (NADX)
1,000	400,000
2,000	800,000
3,000	1,200,000
4,000	1,600,000
5,000	2,000,000

You may subscribe more than once: your wallet's total is capped at 5,000 USDT, so you can start smaller and top up later until you reach the cap. Each subscription locks separately and they all appear together on My Subscription. Once you reach 5,000 the button shows "Fully subscribed."

- 4 Read and **tick the lockup acknowledgement** (it restates: your purchase is locked; no immediate spendable balance; it unlocks on the schedule after TGE).
- 5 Click **Confirm**. Your wallet opens — send the **exact USDT amount** to the Nadrix Treasury address shown on the page.

Payment rules — important:

- Send **USDT on BNB Chain (BSC) only**. Do not send other tokens or use other networks.
- If withdrawing from an exchange, you must select the **BNB Chain (BSC / BEP-20)** network — not ERC20 or TRC20.
- Send the **exact tier amount**. A wrong amount or wrong source will be flagged and refunded, delaying your subscription.

Step 4 – Confirmation and lockup

- Once your payment is confirmed on-chain (we wait **15 block confirmations**, typically around a minute on BNB Chain), the system records it and emails you a confirmation. Your locked NADX stream is then created in batches (authorised by our 4-of-5 multisig).
- Open **"My Subscription"** to see: total NADX, amount locked, unlocked / claimable, and your unlock progress.

Step 5 – Claim (after TGE)

- From **TGE (1 January 2027)** your NADX begins to unlock per the schedule — nothing in the first 6 months, then linearly through month 24.
- Anytime after the cliff, open **"My Subscription"** and click **Claim** to withdraw the unlocked portion to your wallet (you may also use app.sablier.com).

Stay safe

- Use the **official site only** (nadrix.io). We will **never** message you a different payment address, and we will **never** ask for your seed phrase or private key.
- **Verify the receiving address** shown in the app. The app is the source of truth — ignore any address sent to you by chat, DM, or email.
- Use the **same wallet** for application and payment; your whitelist is bound to that address.
- If anything looks off, **stop** and reach us through the official channel below before sending funds.
